

Select *SustainablePlus* Hightower® Willow Oak

Quercus phellos 'QPSTA' P.P.#13,677

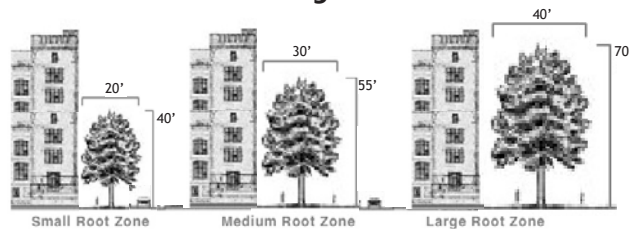

Native shade tree - own root. The first cultivar of Willow Oak available on its own root. According to Dr. Michael Dirr, "Hightower® Willow Oak is the grower's dream tree and the landscape architect's easiest specification. Guaranteed to please because of the naturally developed central leader, uniform distribution of branches, upswept branching disposition, and lustrous dark green leaves turning yellow in autumn."

Specifications

Height: 40-70'

Spread: 20-40'

The Bonsai Effect of Tough Urban Conditions

Turner Broadcasting - Atlanta, GA

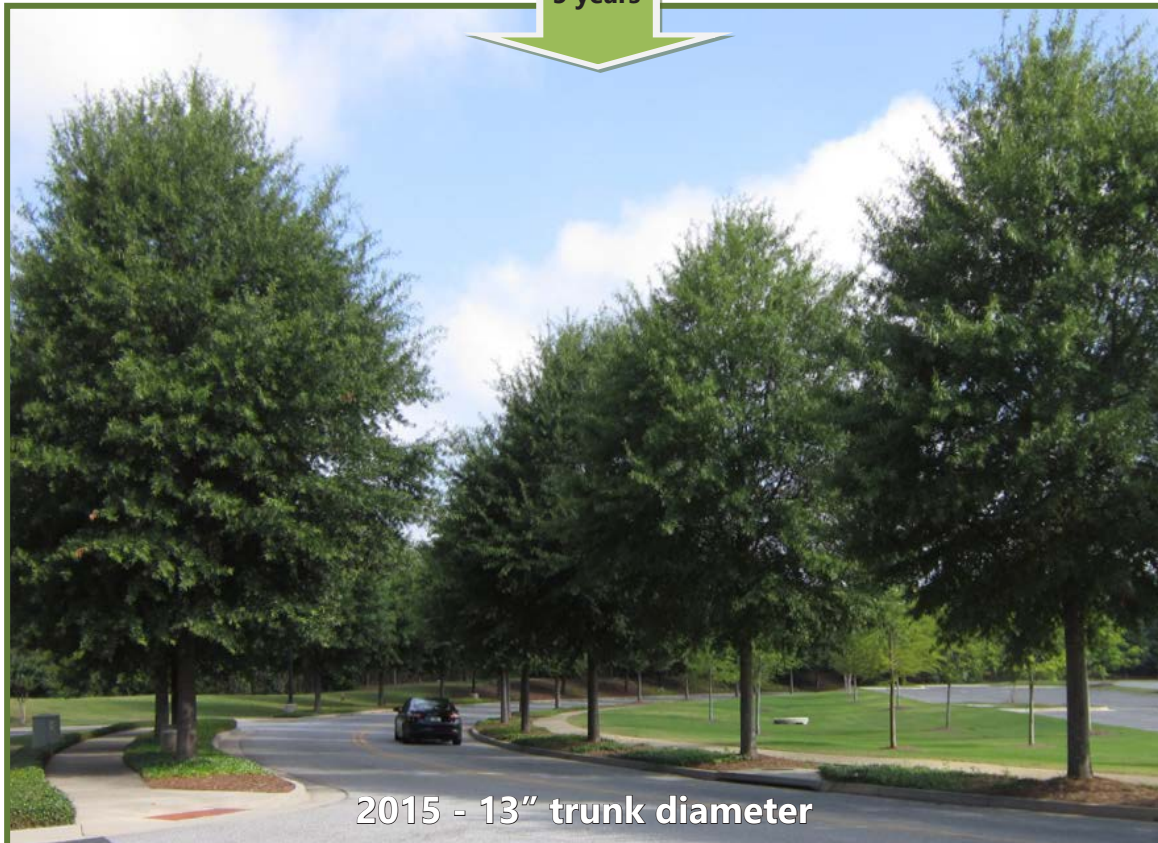

"Select has the best guarantee you could possibly get, because these trees are selected for their vigor in tough urban conditions. They are top-pruned and root-pruned to create dense heads and to create dense root systems, so that when these trees are transplanted, you are guaranteed that they will survive and create a dense, thick urban forest. This is what I get from Select Trees: The finest clonal oaks, and the finest clonal trees that there are on the market."

"Trees are the only part of infrastructure that actually appreciates in value while the rest depreciates." - **Provenzano**

With the expectation that trees are the only part of the infrastructure of our communities that appreciate in value - our concept of Sustainability holds trees to a higher standard. Think of it as ***SustainablePlus***.
