

Endurance™ Compton Oak

Quercus x comptoniae 'QCE295' P.P.A.F.

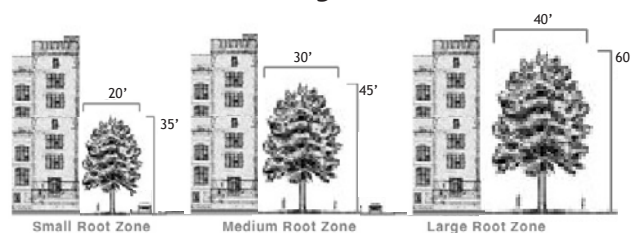

Native shade tree - own root. Endurance™ is the first clonal Compton Oak available on its own root. Compton is a unique natural hybrid between Live Oak (*Q. virginiana*) and Overcup Oak (*Q. lyrata*), both noted to be among the toughest trees for urban environments. Compton Oak was first named by Mrs. Compton of Natchez, Mississippi in the early 1900's. Endurance™ is a vigorous selection and embodies traits of both its parents with great tolerance to many soil types and once established, very drought-tolerant.

Specifications

Height: 35-60'

Spread: 20-40'

The Bonsai Effect of Tough Urban Conditions

Shape: Uniform, dense, dominant leader

Foliage: Dark green

Fall Color: Semi-evergreen
