

Select *SustainablePlus* Highbeam® Overcup Oak

Quercus lyrata 'QLFTB' P.P.#13470

Native shade tree - own root. The first cultivar Overcup Oak available on its own root. Dr. Michael Dirr declares, "Highbeam® Overcup Oak is a refinement of one of the best native species. Its uniqueness resides in the lustrous leathery leaves, changing yellow and bronze-red in fall. Further, leaf drop is clean and uniform, without the lingering dried brown foliage common to many oak species. The gray-brown winter branches and trunk assume a scaly texture, presenting a sculptural silhouette in the winter landscape. Branches are upswept, making Highbeam® a perfect street tree."

Specifications

Height: 30-60'

Spread: 20-40'

The Bonsai Effect of Tough Urban Conditions

Shape: Uniform, dense, dominant leader

Foliage: Dark green

Fall Color: Yellow-Burnt Orange

Hardiness: Zone 6 to 9

Summer Dig: Yes

Native: Yes

Own Root Clone: Yes

"Select Trees' patience, persistence, and propagation savvy open the landscape portal to the world of cultivar oaks. Oaks on their own roots with genetically programmed uniform characteristics including growth habit, summer and fall leaf colors, clean leaf drop in autumn, ease of transplanting, and pest resistance guarantee success in commercial and residential landscapes." - **Dr. Michael Dirr**

"The investment in these sustainable oaks guarantees performance and increased biological perpetuity. Oaks are one of the major climax genera in American forests. They continue to perpetuate themselves in their native state. Now Select Trees has given them extended life in the human-altered landscape." -**Dr. Michael Dirr**

Select *SustainablePlus* Highbeam® Overcup Oak

Compacted urban soils lack oxygen and are often poorly drained.
SustainablePlus trees can thrive in these conditions.

Similar Tough Conditions

Select *SustainablePlus* Highbeam® Overcup Oaks

- Experimental planting at Select Trees in poorly drained soil

- Typical urban soil does not drain and is compacted

*"Highbeam® is easy to transplant and withstands extremes of soil from wet to dry once established. . . **An oak for the ages.**" - Dr. Michael Dirr*
